

ONE DAY ANIMAL HEALTH CAMP CUM PUBLIC AWARENESS PROGRAM ORGANISED AT MANANPUR VILLAGE, JEHANABAD, BIHAR

Animal health camp and public awareness program was carried out on 15.09.2021 by team of ICAR-RCER, Patna in collaboration with Krishi Vigyan Kendra, Gandhar, Jehanabad and Gandhar Agrotech Producer Company Limited in Mananpur, an adopted village of KVK. The main objectives of the program was to spread awareness among the farmers about various animal diseases, their zoonotic potential and preventive measures. The program was conducted under the activities of two institute projects to assess the reproductive problems in animals and prevalence of tick-transmitted diseases. Animals including cattle, buffaloes and horses with various problems like infertility, repeat breeding, cervicitis, fever, anorexia, lameness, bloat, diarrhoea, tick infestation, endoparasitism, mastitis etc., were tentatively diagnosed and remedial measures were provided. Blood, faecal samples and ectoparasites (Ticks of different stages) were collected from the animals that needed laboratory confirmation as well as to fulfil the activities of our two institute projects as mentioned earlier. Proper treatment and advice were provides to the respective animals and drugs including antibiotics, mineral mixture, herbal heat inducers, micro-minerals, acaricidal were provided. We noticed that the area was severely infested with tick and there were all possibilities of tick born diseases so we described the livestock owners about the importance and methods of tick control in animals and premises. The clinical and subclinical mastitis was diagnosed with the help of California mastitis test and proper treatment was provided along with long-acting intra-mammary infusions. Awareness about importance of nutritional management and reproduction was provided to all Livestock owners. The benefits of Dry Cow Therapy was emphasized for use at the end of lactation or during drying off to prevent mastitis after parturition to all farmers. Use of herbal acaricidal like leaves of tobacco, Neem and Sarifaa/Sitafal or custard apple and dry seeds of Sariffa, Karanj and neem. The animal health camp was carried out by Dr Pankaj Kumar, Senior Scientist, Dr Manoj Kumar Tripathi, Scientist of the Division of Livestock and Fisheries management, ICAR-RCER Patna and Dr Dinesh Mahto, Scientist, KVK Gandhar, Jehanabad and Shri Sunil Kumar supporting staff. The event was graced by the presence of Head, KVK Jehanabad Dr. Sobha Rani and other staffs of KVK and the event was covered by local newspaper.

स्वास्थ्य शिविर में 156 पशुओं की हुई जांच
